

PHOENIX INTERNATIONAL RECEIVES NORTHROP GRUMMAN PLATINUM LEVEL - PLATINUM SOURCE AWARD FOR SUPPLIER EXCELLENCE

Award presented by Northrop Grumman Aerospace Systems Sector

ORANGE, CA November 12, 2014 — Phoenix International, Inc., a world leader in rugged data storage systems, has received Northrop Grumman's Platinum Level Platinum Source Award, reflecting the Company's sustained excellence as a supplier of quality products and on-time delivery to Northrop Grumman Aerospace Systems (AS) Sector.

“As you know, the Platinum Source Supplier Award is recognition for your high level of quality and delivery performance as a Northrop Grumman AS supplier.” Remarked Northrop Grumman’s Joseph Jackson, Director of Supplier Quality. “It empowers your company to act on behalf of AS in conducting final acceptance of your products designated as Platinum Source by Purchase Order. In addition, your company holds a favorable position in our supplier base as a recognized Platinum Source Supplier”. Phoenix International supplies Northrop Grumman Aerospace Systems Sector with high performance, rugged RAID data storage systems used in aircraft as well as in training and support applications.

“I am very proud of our Phoenix team,” said Amos Deacon III, President of Phoenix International. “The Platinum Source Award was made in recognition of Phoenix’s demonstrated distinction in meeting performance standards — outstanding quality, commitment to meeting delivery schedules, and focus on customer satisfaction.”

Phoenix International is an AS 9100 rev C/ISO 9001:2008 certified, Service Disabled Veteran Owned Small Business (SDVOSB) manufacturer of Rugged COTS data storage products. Phoenix developed state of the art enabling technology provides users with mass data storage products that ensure the highest performance storage and data network systems. These systems range in size and application from multi-terabyte Fibre Channel RAID, NAS and Storage Area Network (SAN) configurations to conduction cooled plug-in VPX and VME solid state disk storage modules.
